

BEAUTY.

The Face is the first place to show the effects of stress, sun and pollutants. We use an extensive range of products, from completely natural (paraben free) to intense active treatments. Have the skin you've always wanted with a good skin care regime and first class maintenance by one of our trained skin specialists who will perform a thorough skin analysis to give you the best advice on your future skin care.

Your skin care therapist will select from our range of highly active, anti ageing or soothing ingredients and incorporate into your customised facial to suit your skins requirements for ultimate results.

Environ - Skin Care Treatments

Environ strives to be one of the most effective, safest skin care ranges in the world. It has a combination of ingredients Alpha/Beta Hydroxy Acids, Pro Vitamin B5, Anti Oxidants, Vitamin A, Vitamin C and Peptides, to name a few. Environ pioneered the use of Scientific Iontophoresis and low frequency Sonophoresis for photo ageing and other skin concerns. It's called the Ionzyme DF Machine and is specifically designed for Environ Skin Care Treatments to maximise the enhanced penetration offered by the research. It is the first machine commercially available with this potency. Using the Environ DF Machine with your skin care treatment, it enhances the performance and results from all the power packed serums with vitamins and peptides applied to your skin. Up to 4000 times more absorption through the skin, resulting in your skin being loved and revived from the inside out with immediate and visible results for up to 14 x days post treatment. The Environ DF Machine works by opening up the different layers in the skin through vibration and current. Allowing active ingredients to fall and penetrate deep into your layers of skin. Due to it's non evasive design and the fact that no heat is used, it is perfect for all skin types and conditions. No Risks. No Side Effects. No Animal Testing - Never!

All Skin Care Treatments include extractions and a choice of hand and arm massage or neck and shoulder Massage.

Collagen Induction Therapy with DermaPen3

Erase your skins past....

299

1299

90min

Course x 6

Collagen Induction Therapy (aka micro skin needling) with DermaPen3 is a powerful and natural way to stimulate growth factors to increase and regenerate collagen and elastin to promote healthy, hydrated, plump, firmer, smooth and a more glowing complexion.

DermaPen3 systematically creates micro punctures in the skin, and the body naturally responds by launching processes to repair itself. The result is an increased production of normal woven collagen, similar to fractional laser treatment, but without the side effects and downtime.

The advantage of micro skin needling with DermaPen3, is that the procedure protects the epidermis and stimulates natural collagen synthesis.

DermaPen3 glides over the skin creating millions of fine channels. These channels can carry up to 80% more topical nutrients, encouraging transdermal delivery to these nutrients deeper into the skin, to feed cells in the dermis and basal layer of the epidermis.

Shift yourself away from invasive procedures with long down time and opt for a non invasive therapy that regenerates your skin.

Micro skin needling helps with scarring, stretch marks, fine lines, pigmentation, tightening and rejuvenating the skin. Furthermore using a selection of hyaluronic acid, peptides and vitamins, supports the activation and repair process and boosts the foundation of collagen and elastin. Saturating your deepest layers of skin with an intense feeling of hydration.

This is A full face, neck and décolletage treatment. Also includes Uber Peel and LED for optimum results.

Note/ The Course x 6 Package Price is not redeemable with any other Salon Offers.

Hair Removal | Eyebrows | Tints | Tan | Make-Up | Piercing**Hair Removal**

LED

A full Face, Neck and Décolletage skin treatment.

LED is your secret weapon. A light therapy treatment that utilises LED (light emitting diode) lights to correct skin imperfections. The power of light therapy will deliver you radiant, more beautiful skin with LED. LED works to firm, tighten and rejuvenate skin by actively promoting collagen.

Specifically formulated treatments using over 4000 LED lights in a combination of red, yellow, green and blue to make an exclusive blend of skin perfecting light therapy. These target a diverse range of common skin concerns including; skin clearing, redness reduction, skin tone correction, age spots, wrinkles and signs of ageing on the face, neck and décolletage.

Blue light works to reduce acne causing bacteria, clear skin and reduce congestion.

Red light increases blood circulation and lymphatic flow, encouraging the renewal and revitalisation of ageing skin.

Green light targets skin tone correction and detoxifies the skin to reduce redness and irritation.

Yellow light boosts skin collagen production capacity, resulting in rejuvenated and younger looking skin.

Enjoy an age defying, healthier, more youthful appearance with the revolutionary LED technology. Discover the power of light therapy today!
